About Us

Medikode leverages artificial intelligence to transform medical coding, enhancing efficiency, accuracy, and compliance. Our solutions help coders, hospitals, ISVs, and payers optimize workflows and maximize reimbursements.

Our Mission

Our mission is to revolutionize medical coding through artificial intelligence, ensuring efficiency, accuracy, and compliance in the healthcare industry.

We aim to empower healthcare providers with AI-driven solutions that improve revenue cycles, reduce administrative burden, and enhance operational efficiency.

Products

Medikode Assistant

AI-powered assistant that generates preliminary medical codes, enhancing productivity and accuracy. Coders can actively interact with the assistant to refine and validate codes for compliance.

Medikode Validator

AI-powered validator ensures coding accuracy by identifying overlooked codes, validating codes against documentation, and recommending alternatives for optimized reimbursement.

Medikode Auditor

AI-powered auditor reviews submitted claims for accuracy, compliance, and completeness, identifying errors and missing information to reduce denials.

Medikode Assessor

AI-powered assessor that can help the pre-sales team to analyze the prospective clients' claim history and identify missed revenue opportunities.

Medikode Parser

Automated solution that converts Explanation of Benefits (EOB) documents into standardized Electronic Remittance Advices (ERA).
